Accessibility Plan

Area: School Premises and Playground			Responsibility: Resources Committee			
<p>Background: The school currently has no pupils or staff with significant disabilities. Our access routes cause difficulties for wheel chair users, as the entrance has two steps to access the school. However, once over these steps this allows access to all areas on the ground floor. There are a further two steps to access the playground leading to the nursery. All other classrooms are located on the three levels above, which have no facilities for wheelchair users. The staff room is located on the 1st floor. All Toilets (adults and pupils) have non-slip flooring. The school is carpeted throughout to suppress noise levels, provide safe surfaces for children and staff and visually enhance the environment. Acoustics in the hall are not good because of the height of the ceilings.</p> <p>Recent improvements: Signage improved for fire safety. Lighter paintwork in all communal areas as part of rolling redecoration programme.</p>			<p>The school is required to produce a disability equality and access plan for increasing disabled pupils' participation in the school curriculum, etc. This was achieved and is incorporated in this plan.</p> <p>Definition: A pupil has a disability if he or she has a physical or mental impairment that has substantial and long-term adverse affect on his or her ability to carry out normal day to day activities.</p>
