

St. Joseph's Partner Programme

Developing each and every child
to their fullest potential

Programme Objectives

- St. Joseph's Primary School is turning its inner London location into a strong advantage, enhancing outcomes for children through a programme of encounters with a wide range of local cultural, academic and corporate entities, with three aims:
 - To engage fully all children all of the time, measured by accelerated progress;
 - To accelerate progress for specific target children;
 - To give all children encounters with a wide range of local organisations so as to open up to them a wide world of possibilities that many do not access through their family environments.
- The following pages illustrate how local partners can productively engage with the school.

St. Joseph's Core Partner Opportunities
